**THE FUTURE IS
BUILT FOR
THE WORKSITE.**

RUGGED MOBILE DEVICES BUILT FOR THE DEMANDS OF THE CONSTRUCTION SITE.

In an industry where you are constantly out of the office, in the field or on a jobsite, Panasonic Toughpad® and Toughbook® fully rugged devices are designed to take a beating and keep on working—even on the toughest construction sites.

BETTER VISIBILITY

Toughpad and Toughbook mobile devices are specifically designed with daylight-readable displays that are easy to view even in direct sunlight. Plus background illumination allows for easy reading even when working at night.

UNMATCHED PORTABILITY

Lightweight and built to take on nearly any environment, Panasonic Toughpad and Toughbook devices aren't only mobile, they feature long-lasting, hot-swappable batteries that last as long as they're needed.

PROVEN DURABILITY

With drop shock protection and MIL-STD-810G and IP65 certifications, Panasonic Toughbook and Toughpad mobile devices are built for the construction site. No matter the job, these mobile devices can take on dirt, dust, water and just about anything else that comes their way.

CHANGED IMMEDIATELY

Featuring integrated Wi-Fi technology, Panasonic Toughpad and Toughbook mobile devices allow construction companies to stay connected in the office or out in the field. Plus with HSPA, GPS and architectural drawing software, plans can be shared and updated across the company network in real time.

Panasonic recommends Windows.

PANASONIC MOBILITY PORTFOLIO

5" TOUGHPAD FZ-E1 & TOUGHPAD FZ-X1

- Windows (FZ-E1) and Android™ (FZ-X1) fully rugged handheld tablet
- Qualcomm® MSM8974AB2.3GHz Quad-core (FZ-E1) and Qualcomm® APQ8064T 1.7GHz Quad-core (FZ-X1)
- 5" daylight-readable gloved multi touch display
- Rain sensing touch mode
- Data and voice technology
- Webcam and 8MP rear camera with autofocus and LED light
- Loud 100 dB twin speakers
